Bean sticks with foliage - Noch Laser Minis HO series
Natural looking laser-cut plants

Laser-Cut minis® are innovative products ideal for super life-like model landscaping. Designed for HO scale use, these detailed reproductions are equally at home on a OO layout, slot car or 1:87 or 1:76 diorama, or to add depth perception to other gauges and scales.
A laser elaborately cuts each plant out of special multicoloured paper reproducing the finest detail and ensuring that the most delicate structures become visible. The composition of the special laser multicoloured paper allows NOCH Laser-Cut minis® to be tear-proof yet they can can still be easily shaped.
The innovative laser cutting process offers two fundamental advantages when compared to conventional techniques with plastics. Thanks to the multicoloured special paper, NOCH Laser-Cut minis® have a life-like coloured surface producing a very natural appearance as they do not have the artificial shine of plastic products.

Construction is very easy: Laser-Cut minis® are shaped by hand and fixed with a little glue onto the model landscape.

Price : £5.40p (£4.50p excl. VAT)
